

Ultra-High Availability NVR for mid-sized projects

The Aimetis R2032 Network Video Recorder offers a powerful hardware package configured with enterprise class hardware features and high storage capacity. Preloaded with Aimetis Symphony™ 7 video management software (VMS), the R2032 is equipped with hot-plug redundant power supplies and 32TB usable recording capacity in a RAID-6 array.

Available in two configurations, the R2032 is ideal for customers looking for a validated, turnkey solution with an open platform VMS that supports a wide range of IP cameras and encoders. A single CPU version is optimized for projects requiring basic recording capabilities for up to 64 cameras while the dual CPU model provides additional processing power needed for server-based analytics.

All Aimetis R-Series recorders includes three years of hardware support, including next business day on-site hardware replacement service.

Key Benefits

✓ Ease of Installation and Extensive Support

The appliance comes preconfigured with all of the necessary software and licensing to minimize installation time. Based on validated hardware components, and bundled with three years of comprehensive hardware and software support, the R2032 can be deployed and maintained worry free.

✓ Increased Availability

Redundant, hot-swap components improve NVR uptime. Continuous monitoring of key system elements, performance metrics, and health indicators provides advance notice of potential issues. System events are visible directly in the Symphony Client and optionally available through Aimetis Enterprise Manager™. When required, Aimetis will perform remote diagnostics and dispatch a technician to the site.

✓ Broad Ecosystem Support

The Aimetis R2032's capabilities can be extended through additional Aimetis products and services. Aimetis embedded analytics software is fully supported in addition to the pre-loaded server-based analytics, enabling a broad range of deployment scenarios. The Aimetis Thin Client™ also offers a secure and convenient video viewing option in space constrained environments. Finally, Aimetis Enterprise Manager provides centralized cloud based monitoring and administration needed in multi-site deployments.

✓ Analytics Ready

With its dual CPU configuration, the R2032-48A delivers high performance computing required by server-based analytics applications. Preloaded with four Core Analytics Pack licenses, the system is optimized for a myriad of indoor and outdoor video detection applications out-of-the box. Additional analytics licenses can be added as needed.

✓ Open, Fully Featured Video Management Software

Aimetis Symphony 7 is an innovative, open video platform for video management, video analytics, system integration, and alarm management. Symphony 7 offers a feature-rich, easy-to-use interface and incorporates IT-friendly features to make administration and remote health monitoring simple and scalable.
