Release 2.10.1 (May 2018)

Fixes

Issue ID	Description
VMS-1669	The iOS Mobile Application works as expected with Symphony Server 6.x.
VMS-1670	The play, pause, forward, and backward buttons appear as expected in the iOS Mobile Application when connected to Symphony Server 6.x.
VMS-1671	Historical video play as expected when selecting an alarm in the iOS Mobile Application when connected to Symphony Server 6.x.

Release 2.10 (May 2018)

Improvements

Issue ID	Description
VMS-1658	The iOS Mobile Application displays a message if video is loading slowly.
VMS-1659	The iOS Mobile Application uses hardware-accelerated OpenGL texture rendering for video streaming. This results in smoother video and lower CPU and battery consumption on the iOS device.

Fixes

Issue ID	Description
VMS-1495	Video continues to play as expected after a connection to the Symphony is lost and then restored.
VMS-1564	The Loading Video screen displays correctly on the iPhone 6.
VMS-1592	The iOS Mobile Application works as expected when you change the playback speed (forward or backward) for video.
VMS-1593	Historical video plays at the correct speed.
VMS-1595	You can play historical video without first selecting a time from the calendar.
VMS-1619	The iOS Mobile Application does not stop responding if the Connection page is open while connecting to the Mobile Bridge.
VMS-1623	Push notifications work as expected.
VMS-1634	The iOS Mobile Application plays video as expected when connected to slower networks.
VMS-1656	Video starts playing as expected after initializing.
VMS-1664	Alarm thumbnails do not appear when the setting is turned off.

Release 2.9.3 (February 2018)

Improvements

Issue ID	Description
VMS-1589	The iOS Mobile Application displays an image from the camera while it loads video from the camera.

Fixes

Issue ID	Description
VMS-1587	The pinch-to-zoom functionality works as expected.
VMS-1588	The iOS Mobile Application displays video correctly when you change the orientation of the device.

Release 2.9.2 (January 2018)

Fixes

Issue ID	Description
VMS-1582	The pinch-to-zoom functionality has improved.

Release 2.9.1 (January 2018)

Fixes

Issue ID	Description
VMS-1580	Video plays as expected on iOS devices connected to Symphony Server 6.x.
VMS-1581	The delay before the iOS Mobile Application starts playing video has been reduced.

Release 2.9 (January 2018)

Improvements

Issue ID	Description
VMS-1547	The Mobile Application supports iOS 11.
VMS-1554	You can select the video resolution that the mobile device streams from Symphony.

Fixes

Issue ID	Description
VMS-566	Mobile Bridge selects the correct video stream when you use multiple video streams.
VMS-1553	With Symphony 6, the mobile device displays video in the resolution that most closely matches the video resolution of the mobile device.
VMS-1561	The Mobile Application does not display controls when initializing video.
VMS-1563	Historical video plays at the correct speed.
VMS-1571	The extra blank space below the camera list has been removed.
VMS-1572	The Mobile Application does not try to open multiple camera views if you tap the camera list multiple times.

Release 2.8.2 (October 2017)

Note: To use the iOS Mobile Application 2.8.2, you must install a certificate and use SSL for mobile connections to Symphony Mobile Application 2.6.x and 2.7.2 or later. (This is an Apple requirement.) Also note that this release cannot be used with Symphony Mobile Bridge 2.7.0 or 2.7.1.

- For more information on using SSL for mobile connections, see page 9 of the Symphony Mobile Bridge Installation Guide at <http://aimetis.com/Library/Download.aspx?I=00364&L=en>.
- For information on creating a self-signed certificate, see page 12 of the Symphony Mobile Bridge Installation Guide at <http://aimetis.com/Library/Download.aspx?I=00364&L=en>.

New features

Issue ID	Description
VMS-1538	The iOS Mobile Application does not stop responding when you start transmitting video from the camera on the iOS device to Symphony.

Release 2.8 (January 2017)

Note: To use the iOS Mobile Application 2.8, you must install a certificate and use SSL for mobile connections to Symphony Mobile Application 2.6.x and 2.7.2 or later. (This is an Apple requirement.) Also note that this release cannot be used with Symphony Mobile Bridge 2.7.0 or 2.7.1.

- For more information on using SSL for mobile connections, see page 9 of the Symphony Mobile Bridge Installation Guide at <http://aimetis.com/Library/Download.aspx?I=00364&L=en>.
- For information on creating a self-signed certificate, see page 12 of the Symphony Mobile Bridge Installation Guide at <http://aimetis.com/Library/Download.aspx?I=00364&L=en>.

Improvements

Issue ID	Description
VMS-1287	Added required support for TLS 1.2 protocol.
VMS-1365	Video is smoother in certain circumstances.

Fixes

Issue ID	Description
VMS-1334	The iOS Mobile Application does not stop responding if you relaunch the application after locking and unlocking the iOS device with the application option.
VMS-1378	Alarm notifications work as expected.
VMS-1379	Correct error message is shown for lost camera connection alarm.
VMS-1380	Alarm Details form fields are now in the same order on iPhones and iPads.

Release 2.7.8 (November 2016)

Note: Symphony Mobile Application 2.7.8.x works with Symphony Mobile Bridge 2.7.4.x and later with supported Symphony 7.x releases or Symphony Mobile Bridge 2.2.3 with supported Symphony 6.x releases.

Fixes

Issue ID	Description
VMS-1255	Swiping between cameras works as expected after zooming.
VMS-1285	The iOS Mobile Application uses the correct video stream.

Release 2.7.7 (November 2016)

Note: Symphony Mobile Application 2.7.7.x works with Symphony Mobile Bridge 2.7.4.x and later with supported Symphony 7.x releases or Symphony Mobile Bridge 2.2.3 with supported Symphony 6.x releases.

Fixes

Issue ID	Description
VMS-1258	Video starts as expected when the iOS Mobile Application and Mobile Bridge are on different networks.

Release 2.7.6 (October 2016)

Note: Symphony Mobile Application 2.7.6.x works with Symphony Mobile Bridge 2.7.4.x and later with supported Symphony 7.x releases or Symphony Mobile Bridge 2.2.3 with supported Symphony 6.x releases.

Fixes

Issue ID	Description
VMS-1248	Video images are no longer clipped (or too large for the screen) when connecting to Symphony 6.x using Mobile Bridge 2.2.3.

Release 2.7.5 (October 2016)

The iOS Mobile Application 2.7.5 works with Mobile Bridge 2.7.4 and later, or Mobile Bridge 2.2.3 with supported Symphony 6.x releases.

Improvements

Issue ID	Description
VMS-565	The iOS Mobile Application supports notification sounds for new alarms.

Fixes

Issue ID	Description
VMS-1218	The transmit functionality works properly over various network configurations.
VMS-1235	The iOS Mobile Application does not stop responding when you try to view historical video when there is no footage available.
VMS-1236	The iOS Mobile Application does not stop responding when playing live video.
VMS-1244	The iOS Mobile Application displays video when it is connected to a Wi-Fi network from a LAN different from the LAN that the Mobile Bridge is connected to.

Release 2.7.4 (October 2016)

The iOS Mobile Application 2.7.4 works with Mobile Bridge 2.7.4 and later, or Mobile Bridge 2.2.3 with supported Symphony 6.x releases.

 **Important:** To configure video streaming on mobile devices, see [KB 10448](#).

Improvements

Issue ID	Description
VMS-1232	The iOS Mobile Application supports RTSP video proxy servers.

Fixes

Issue ID	Description
VMS-1235	The iOS Mobile Application does not stop responding when you try to view historical video when there is no footage available.

Release 2.7.3 (September 2016)

Fixes

Issue ID	Description
VMS-1218	The transmit functionality works as expected.
VMS-1229	The iOS Mobile Application uses the internal and external IP addresses of the Symphony server for RTSP correctly.

Release 2.7.2 (September 2016)

Fixes

Issue ID	Description
VMS-1228	The iOS Mobile Application does not freeze when displaying video from Symphony 6.x over the mobile network.

Release 2.7.1 (September 2016)

The iOS Mobile Application 2.7.1 works with Mobile Bridge 2.7.1 and Mobile Bridge 2.2.3.

Fixes

Issue ID	Description
VMS-1222	The iOS Mobile Application can stream video from all Symphony servers in a multi-server farm using a WAN IP.

Release 2.7 (September 2016)

Symphony Mobile Bridge 2.7 works with Symphony 7.0. Mobile Bridge 2.7 does not work with Symphony 6.x or earlier.

The iOS Mobile Application 2.7 works with Mobile Bridge 2.7 and Mobile Bridge 2.2.

New features

Issue ID	Description
VMS-1023	Support h.264 video streaming of video from Symphony.
VMS-1025	Support transmission of video from iOS device camera to Symphony with Manufacturer type of "Mobile" in Symphony – this can be viewed live by other Symphony (or Mobile) users.

Improvements

Issue ID	Description
VMS-760	JPG and video performance has improved.

Fixes

Issue ID	Description
VMS-849	Additional information was added to alarm messages.
VMS-587	Now adheres to the View Rule and Change Rule permission in Symphony.
